

# Marco Arias M.

## About me

I'm a tech passionate, I love digital environments. I've worked with multiple tools to develop a wide spectrum of apps and programs. I Love programming and development.

## WORK EXPERIENCE

### Freelance, Mexico: Lead *Programmer*

I worked as a back end lead programmer in multiple projects. Mainly web development in PHP but also video games development.

### Xubax, Morelia: IT Manager

I supervised, developed and gave maintenance and managed multiple web pages, apps, servers and projects of the enterprise mainly on the lamp stack.

### BCode Mexico, Morelia: Web Developer

I've developed a wide variety of web pages using PHP, .net C#, angular TypeScript, Javascript, etc. I've been working both, front and back-end

## EDUCATION

### Universidad de Morelia, Morelia: *Video Games Engineer*

## PROJECTS

### Villas del fresno: *File Manager*

A PHP Project made for a building company to help them manage their files in a web app.

### Starmedica

One of the main customers i've worked with is Starmedica, some of the projects I've developed for them are:

- Site to manage Travel Expenses
- 2.0 Version of the site for providers invoices receipt
  - Both of them were developed using php technology and connection to SAP through SOAP WS
- System to manage the certification process for providers developed in .net
- Internal management site for medical equipment and Inventory
- Site to control financial, fiscal information and tax situation of employees.
- Web security standards supervision and implementation in various sites.

various collaborative sites made to communicate internally and externally using sharepoint, yammer, power automate and ms teams technology

### GPS Tracking

A site to track down transport units using gps in real time, it uses Angular.net, mongoDB and SQLServer technologies.

## Programming Languages

I have a great proficiency using PHP, C# and JavaScript, a medium proficiency in CSS, Java and C++ and I know the basics of angular typescript and python.

## Tools I use

I have some experience using Laravel and ASP.NET. I've used some REST RESTful and SOAP API's. I often work with C#, PHP and Javascript. Additionally, I have experience managing linux servers and general server configuration and maintenance through SSH. I've developed multiple projects using C# and C++. I mainly use GitHub as a version control system.

## Portfolio

<https://github.com/Martux99/Portfolio>

## Soft Skills

Proficiency solving problems

Mid-advanced programming abilities

Ease to learn new technologies and to develop new abilities

Experience working with medium and large teams

Flexibility

## Achievements

Webpage development through the last 2 years, I've developed multiple enterprise-level web pages both, as a freelancer and as part of my job duties

### Wide range of use of technologies

As a part of my development as a freelance programmer, I've learned to use a lot of different technologies and techniques that are used in software development

## Languages

Spanish: (native)

English: Advanced level (conversational and written)

French: intermediate
